WIOD Newsletter 21 January 2010

WIOD Conference: Industry-Level Analyses of Globalization and its Consequences, Vienna, May 26-28, 2010

As announced before, the first full WIOD-consortium meeting after the project's kickoff will be held in Vienna, from May 26 till May 28, 2010.

This meeting not only aims at sharing recent news on data construction issues and plans to conduct analytical research with the dataset, but also at exchanging ideas with interested people external to the consortium. Therefore, the format of this meeting is a conference and participation is *not* restricted to consortium members.

Deadline for abstracts: March 15

Further information: Call for Papers

Report on the WIOD Data Construction Meeting, Paris, 3 and 4 December, 2009

On Thursday 3 and Friday 4 December, 2009, the OECD hosted the second WIOD data construction meeting in Paris. Together with a team of invited experts, the challenges that lie ahead in constructing the WIOD database were discussed. The presentation slides and the meeting report are now available online on the Reports page of the WIOD website (<http://www.wiod.org>). Note that this file is accessible for consortium members only. Please contact us at wiod@rug.nl if you are a member of the consortium and have trouble logging in.

WIOD deliverables

Next to the website, the meetings and the newsletters, four deliverables are delivered. These are:

- D1.1 (Report outlining detailed strategy for SUT data collection and processing), by WP1, due in month 1;
- D2.1 (Report outlining detailed strategy for trade data collection and processing), by WP2, due in month 3;

- D4.1 (Technical report on the conceptual framework for environmental satellites integrated in the WIOD system of SUTs and IOTs), by WP4, due in month 3.
- D6.1 (Technical report on advantages and disadvantages of types of input-output tables (product-by-product or industry-by-industry), by WP 6, due in month 6.

The deliverables are now available online on the Reports page of the WIOD website (<http://www.wiod.org>). Note that these files are accessible for consortium members only. Please contact us at wiod@rug.nl if you are a member of the consortium and have trouble logging in.

WIOD working paper series

Please take a look at the publications on the WIOD website (<http://www.wiod.org/publications>), on which we posted the second WIOD working paper: "Projection of supply and use tables: methods and their empirical assessment", by Umed Temurshoev, Norihiko Yamano and Colin Webb. If you have papers for this series, please let us know.

WIOD Sessions at the Input-Output Conference 2009 in Sao Paulo

WIOD representatives were present at the 17th International Input-Output Conference in Sao Paulo (July 13-17, 2009). Erik Dietzenbacher and Bart Los organized two special sessions, which were devoted to the WIOD project. The main aim was to make researchers in the global community of input-output researchers aware of the objectives of the project. More information is available through the IIOA website.

WIOD Sessions at the Input-Output Conference 2010 in Sydney

The 18th International Input-Output Conference will be held in Sydney (June 20-25). José Manuel Rueda-Cantuche is chairman of the Scientific Programme Committee. At this conference, Erik Dietzenbacher and Bart Los will again organize one or two special sessions devoted to WIOD. This time, we intend to have a focus on papers dealing with data construction issues, with respect to supply and use tables, trade data, and data to be included in the socio-economic and environmental satellite accounts. Consortium members are encouraged to submit abstracts of 100 words at maximum to b.los@rug.nl, before *February 15*. Decisions on acceptance will be announced by March 1. Please note that full papers for this conference are due on April 30. General information can be found at http://www.isa.org.usyd.edu.au/io_2010/

Interview Bart van Ark and Erik Dietzenbacher, FEB Research Magazine, Spring 2009

Bart van Ark and Erik Dietzenbacher gave an interview that appeared in the Spring 2009 issue of FEB Research (a bi-annual magazine of the Faculty of Economics and Business of the University of Groningen, on research activities), about the start of the WIOD-project and the results of EU KLEMS. A pdf-version of the magazine is available through the faculty's website., <http://www.rug.nl/feb/Onderzoek/FEBResearch02Spring09.pdf>, p16-19.

We hope to see you in Vienna!

Erik Dietzenbacher
Bart Los
Marcel Timmer
Astrid van der Veen-Mooij
